

2016 Training Provider XCG

Filtration – 0.7 CEU – This one-day course is designed to provide water treatment operators with an operational understanding of the safe operation and maintenance of common drinking water filtration systems. Topics covered will include: filter design and function, filter performance calculations, filter control systems, and filtration problem solving.

OR

Watermain Flushing and Swabbing – 0.7 CEU – This one-day course is designed to teach operators the different types of flushing and swabbing programs/procedures. Participants will learn how to plan a unidirectional flushing program. This course will also identify & explore other watermain cleaning techniques, such as swabbing, pigging and mechanical scraping
